### 4.2.3

#### REPORT OF ACTIVITIES

Under Graduate students of our institute are posted in various laboratories. Following are the activities conducted:

At Dental Anatomy and Dental Histology (DADH) laboratory, in the Oral pathology department, 1<sup>st</sup> BDS students learn in detail about tooth anatomy by carving every tooth using a wax block. This will give a detailed insight into tooth morphology to the students.

At the Preclinical Operative laboratory, in the Department of Conservative Dentistry and Endodontics, 2<sup>nd</sup> BDS students undergo preclinical training on plater models, extracted teeth and typodont teeth before working on patients. They learn tooth preparation on all teeth of different variations to receive different filling materials as a restoration.

At the Preclinical Prosthetics laboratory, in the Department of Prosthodontics, Crown and Bridge, 1<sup>st</sup> and 2<sup>nd</sup> BDS students undergo preclinical training to fabricate Complete Dentures before working on patients.

Interns, when posted in the Department of oral pathology and Microbiology they undergo two days of observer-ship training at Central Research Laboratory (CRL) for two days which includes observation related to lab techniques like oral microbial culture, PCR, ELISA and cell culture.
