4.2.4 Description of community based Teaching-Learning activities

Community based learnings are encouraged at large. Our satellite clinic with attached rural PHC is based in village Kadoli which has a of population of approximately 8200-8500 and is functioning very well. We have a 2-deaddiction center, Sahara and Shrisakti, in Urban health centers where counseling for quitting tobacco habit is done

Final year students participate in community-based Teaching Learning activities as field visits to the Primary health center, satellite dental clinic, to know various aspects of oral health care in the community. Lot of surveys and studies related to the same are encouraged.

Interns in their two month of community posting participate in community-based Teaching Learning activities as –

Health education: Each batch of interns has an exclusive 1 month posting for health education. Here the intern involves in developing informational materials for educating the community.

House to house visits: Interns are involved in periodic house to house visits to create awareness in community regarding the dental disease and importance of dental hygiene. Large number of communities are helped by this service.

Diagnostic and Screening camps: During internship one month is exclusively dedicated to extension activities. The students involved organize and conduct diagnostic, screening, and treatment camps in the community.

Special activities: There is a weekly visit on every Monday to Primary health center and the adjacent Aganawadi, additionally, weekly visit on Tuesdays to deaddiction center. In these centers along with examination, basic dental care like oral prophylaxis, dental restorations are carried out and patients are referred to the institution for advanced treatment.
